

YASHVANTH R

Bangalore, Karnataka 560079 (+91)9591622064 yashvanthr064@gmail.com [LinkedIn](#) [GitHub](#) [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Developer with 1.8+ years of experience designing, building, and deploying scalable web applications from concept to production. Experienced in developing modern, responsive applications using React.js, Next.js, Node.js, TypeScript, and JavaScript, with hands-on expertise in building RESTful APIs and integrating backend services using Express.js, NestJS, and FastAPI. Skilled in developing CMS-driven platforms, authentication systems, payment gateway integrations, and admin dashboards. Strong experience with Docker, AWS, CI/CD pipelines, Grafana, and Prometheus for deploying and monitoring production applications. Passionate about writing clean, maintainable code, optimizing performance, and delivering reliable, user-focused solutions in fast-paced development environments.

PROFESSIONAL SKILLS

Programming Languages: Python, TypeScript, JavaScript, SQL

Front-end Development: React.js, Next.js, Responsive UI, Tailwind CSS, Bootstrap, Chakra UI, Shadcn UI

Backend & Microservices: Node.js, Nest.js, Flask, FastAPI, RESTful API's, Celery, RabbitMQ

Databases: PostgreSQL, MySQL, MongoDB, SQL Server, Redis

Payments & Authentication: PayPal, PayU, Stripe, Supabase Auth

State Management: Redux Toolkit, Zustand

Cloud & Deployment: AWS(EC2, S3, Amplify, Lambda, API Gateway, SES, SNS), Vercel, Docker, Docker Compose, CI/CD, Prometheus, Grafana

Tools & Collaboration: Git, GitHub

CMS & Database: Strapi, Supabase

EDUCATIONAL BACKGROUND

Bachelor of Engineering (B.E) in AI and Data Science

Global Academy of Technology, CGPA: 9.14

07.2024

Bangalore, India

Pre-University (PU) in PCMB

MES PU College, Percentage: 81.67

08.2020

Bangalore, India

Secondary (SSLC)

Max Muller High School, Percentage: 90.56

04.2018

Bangalore, India

WORK EXPERIENCE

Multiple roles – Frontend Developer | Full Stack Developer (present)
Cybrisk Tech Pvt Ltd (Full-Time)

Bangalore, India
11.2024 – Present

- Developed scalable web applications using **Next.js, React.js, TypeScript, and Node.js**, delivering responsive, high-performance user experiences.
- Built a **CMS-driven eCommerce platform** (Sams Shopping) from scratch using **Next.js and Strapi**, with Supabase Authentication, **dual-currency (INR/USD)** pricing, secure checkout via **PayPal and PayU**, order management, and an admin dashboard for sales and revenue tracking.
- Designed and integrated REST APIs with Node.js, Express.js, NestJS, FastAPI, ensuring reliable communication between frontend, CMS, and backend services.
- Developed a student scholarship management platform (SVTC Trust) using Next.js (frontend & backend), featuring student application workflows, admin approval/rejection, and application tracking dashboards.
- Implemented efficient state management using Redux Toolkit and Zustand, improving application performance and maintainability.
- Containerized applications using **Docker and Docker Compose**, and built CI/CD deployment pipelines on **AWS, leveraging VPC, Lightsail, S3, along with Grafana and Prometheus for monitoring and observability**.
- Optimized application performance, debugging, and deployment workflows, improving responsiveness, scalability, and release reliability.

Project Intern
Indian Institute of Information Technology (Internship)

Allahabad, India
10.2022 – 01.2023

- Developed and optimized machine learning models for data analysis and future trend prediction.
- Focused on image processing and implemented classifiers using advanced machine learning algorithms.
- Enhanced data accuracy and implemented controls for better model performance.
- Delivered accurate prediction models by refining algorithms and tuning hyperparameters.

PROJECTS

Dynamic Form Builder – React.JS, Typescript, Redux Toolkit, Material UI ([GITHUB](#))

- Built a fully dynamic form builder application supporting 7 field types, advanced validations (required, email, password, length), and derived fields (e.g., auto-calculating age from date of birth).
- Implemented drag-and-drop (react-beautiful-dnd) for intuitive field reordering with real-time form preview.
- Integrated **Redux Toolkit** for scalable state management.

Keep Notes – Personal Note-Taking Application – Next.JS, FastAPI, MongoDB ([GITHUB](#))

- Developed a full-stack note-taking application with secure **JWT-based authentication**, supporting user signup/signin and private notes.
- Designed a responsive, modern UI using Next.js (React 15), Tailwind CSS, and Zustand for state management.
- Implemented a **FastAPI** backend with MongoDB (Motor driver), **Pydantic validation**, and **Uvicorn** for scalable async performance.

Microservices Architecture – Node.js, Express.js, RabbitMQ, MongoDB, Docker ([GITHUB](#))

- Built a distributed microservices system using Node.js, Express.js, MongoDB, and RabbitMQ to enable scalable and decoupled service communication.
- Implemented event-driven messaging for real-time task notifications, improving system responsiveness and reliability.
- Used Docker and Docker Compose to containerize and orchestrate multiple services for smooth local deployment and testing.
